# BONO online

Fiscal printer

**MODERNITY OF ONLINE CONNECTION** - Thanks to electronic transmission, fiscal receipts are systematically sent to the Central Server and users do not have to worry about their storage. The electronic journal is also kept in the protected memory of the device. Access to saved data is very easy - the user has permanent access to the protected memory of the cash register via the application and can freely read data stored therein.

**CONVENIENCE ABOVE ALL** - A quick and trouble-free paper replacement in the printing mechanism is a key issue. The clamshell mechanism makes the paper changing operation very easy - just "put in and work". This high quality SEIKO printing mechanism prints fiscal receipts, fiscal reports and invoices very quickly and quietly.

**ERGONOMICS AND FUNCTIONALITY** - The precise printer keyboard is backlit with blue LEDs, which makes its operation very easy and convenient. The navigation key helps you navigate the extensive printer menu. The printer has a very wide range of non-fiscal printouts, which can be used to print confirmations, lists and other documents necessary for the functioning of your store / company. You do not need any additional printers. By modifying font sizes, you can also print large alphanumeric codes legible from a long distance.

**UNIVERSAL COMMUNICATION** - The printer communicates with the PC through a traditional USB and RS232 connector or a modern LAN network connector, using the most popular communication protocol in Poland. The BONO Online printer uses also the Novitus XML communication protocol, which greatly facilitates communication with web-based sales systems. In addition, the BONO Online printer can be upgraded with the following modules: WLAN, Bluetooth and GSM. Remember that your data are protected by the TPM encryption module and two-way authentication during network communication.

<b>Technical Specification</b>		
PLU	1 000 000	
VAT rates	7	
Cashiers	no limit	
PLU name	40 characters	
<b>Printing Mechanism</b>		
Type	thermal, "clamshell" type	
Model	SEIKO, LTPC 245	
Paper width	57 mm, roll length: up to 60 m	
<b>Keyboard</b>		
Type	membrane	
Number of keys	4+navigation key (up, down, left, right)	
<b>Display</b>		
Customer	Graphic, backlit, blue LCD, 132x64 pixels	
Operator	Graphic, backlit, blue LCD, 132x32 pixels	
<b>Interfaces</b>		
Communication interfaces	2xRS232, USB, Ethernet, WLAN, BT	
Cooperation with devices	PC	
Cash drawer control	Passive 6-24V	
<b>Power Supply</b>		
External	AC power adapter 230 / 12V; 3A	
Internal	Battery 6V; 3Ah	
<b>Dimensions</b>		
Width / Height / Depth	146 / 145 (190) / 215 mm	
Weight	1,75 kg
