## HD E Fiscal printer

[www.novitus.pl](http://www.novitus.pl) • [www.online.novitus.pl](http://www.online.novitus.pl) • [www.novicloud.pl](http://www.novicloud.pl)

**The first one in the market with a color display** • The NOVITUS HD E printer is the first fiscal printer in the Polish market with a color customer display that display messages and graphics in High Color mode. The printer records the electronic journal on a small storage medium - the SD card.

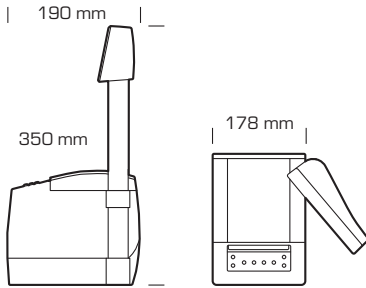

**Japanese durability and precision** • The fiscal printer has a reliable, professional, very durable and high-speed printing mechanism of the Japanese company Citizen, which prints not only fiscal receipts but also invoices and various non-fiscal printouts, graphics, barcodes and QR codes. In the HD E, the paper roll can be changed in no time - just "put it in and work".

**Graphical printing process** • The HD E printer can print documents on the paper of two widths - 57 or 80 mm, depending on user's needs. The entire printing process is graphical, which ensures excellent readability and aesthetics of printed documents and allows you to freely interweave text and graphics within the limits permitted by legal regulations.

**Extensive information about products sold** • The printer fulfils perfectly new requirements of the Ministry of Finance: it can print the buyer's tax identification number on receipts and allows for a very precise identification of products/services sold, because the PLU name is up to 60 characters long and every product may have an additional description.

**Additional form of advertising** • A large, color customer display will attract attention of every buyer and make the interior of your store or sales stand more attractive. It displays very clearly all printer messages and menus as well as any animated advertisements uploaded by its owner.

**Full compatibility** • The fiscal printer has a LAN connector, two RS232 connectors and a double-channel USB connector. It communicates with the PC through the most popular communication protocols in the Polish market, compatible with the previous models of Novitus fiscal printers, and through the new NOVITUS XML protocol.

<b>Technical Specification</b>		
PLU	1 000 000	
VAT rates	7	
Cashiers	no limit	
PLU name	60 characters	
Euro currency operation	yes (multi-currency)	
Electronic Journal	NOVITUS SD card, 4 GB (capacity approx. 2.5 million receipts)	
<b>Printing Mechanism</b>		
Type	thermal, easy-loading, CITIZEN CT-S601	
Characters per line	44 or 64	
Paper width • roll length	57 or 80 mm • 100 m	
<b>Keyboard</b>		
Type	switch, backlit	
Number of keys	8 + power switch	
<b>Display</b>		
Customer	rotating, color LCD TFT, 4,3"	
Operator	shared with customer display	
<b>Interfaces</b>		
Communication interfaces	2 x RS232, 1 x USB, LAN	
Cooperation with devices	PC, palmtop, laptop, etc.	
Cash drawer control	6-24 V	
<b>Power Supply</b>		
External	external power adapter 230 V/24 V; 2,1 A	
Internal	LiFePo4 battery, 14,4 V; 1,4 Ah	
<b>Dimensions</b>		
Weight	4 kg
