NOVITUS

deon••e_{lan}

Fiscal printer

Deon Lan E is a fiscal printer made using modern technology, enclosed in a handy and ergonomic casing, created for people conducting mobile sales using a computer, laptop or PDA, or traditional sales, where the shop counter has a limited area. Despite its small size, its possibilities are enormous. It is the smallest printer in the NOVITUS line, and also one of the smallest on the market, registering copies of printouts on an electronic data carrier, according to the guidelines of the Regulation of the Minister of Finance and the Minister of Economy.

DEON E • Modern technology, enclosed in a handy and ergonomic casing, created for people conducting mobile sales using a computer, laptop or PDA, or traditional sales, where the shop counter has a limited area. Despite its small size, its possibilities are enormous.

Printing mechanism • Highly efficient internal battery, the ability to print up to 2,500 receipts without power supply. Thanks to the "clamshell" printing mechanism, changing the receipt roll is extremely easy, done according to the motto "drop in and work". A high-quality printing mechanism from the well-known Fujitsu company prints receipts, necessary reports and VAT invoices very quickly and quietly. The printer's work program intelligently "compacts" all printouts, saving paper as much as possible, leaving no unprinted areas between printouts.

Receipt with full information • DEON E can program and print the business's graphic logo in the header and any graphic in the footer of the receipt. Thanks to a special template, any non-fiscal printout can be printed from its program, including a non-fiscal invoice. On such printouts, you can place barcodes with adjustable height, QR codes and any of the 10 graphic files previously programmed in the printer's memory.

Communication • The printer can communicate with a computer via a modern USB port or traditional RS232 using the most popular communication protocol in Poland. After installing an optional Bluetooth module, you can use the printer in a portable way by communicating with a computer, laptop or palmtop without additional cables. The new printer motherboard features a new processor, new operating system and new communication interfaces, bringing new possibilities. The printer can be equipped with optional BT or WiFi wireless communication links.

Thanks to a special template, any non-fiscal printout can be printed from its program, including a non-fiscal invoice. On such printouts, you can place barcodes with adjustable height, QR codes and any of the 256 graphic files previously programmed in the printer's memory. The printer has the option of printing the buyer's tax number on the receipt (as well as the ID number or other details).

Data parameters		
Number of products	1 000 000	
Number of PTU rates	7	
Number of cashiers	without limitation	
Product name	40 characters + 3 description lines	
Euro currency support	yes (multi-currency)	
Printing Mechanism		
Type	thermal, „drop in and work” mode	
Paper width, roller length	57 mm, 30 m	
Keyboard		
Type	switch, protected from flooding	
Number of buttons	23	
Displays		
Client	graphic LCD, black-white, 192x48 pixels	
Cashier	graphic LCD, black-white, 192x48 pixels	
Interfaces		
Communication connection	1x LAN, 1x USB Host (A), 1x USB device (B), 1xRS232 optional: BT, WLAN	
Cooperation with devices	computer, palmtop, laptop	
Cash drawer control	yes (active)	
Power supply		
External	External power supply 230 V / 12 V; 2 A	
Internal	Built-in gel battery 7,4V; 2Ah	
Dimensions		
Width/height/depth	94 x 58 x 229 mm	
Weight	0,65 kg	

Novitus – Retail Technology Center

Novitus is a brand of professional solutions for trade, services and logistics. We support your business by providing the best fiscal devices on the market as well as advanced sales systems and software. Novitus brand belongs to Comp SA, the leader of secure IT solutions.
