# BONO Lan e

Fiscal printer

**The BONO Lan E** fiscal printer brings modern technology, enclosed in a handy and ergonomic casing intended for small and medium-sized retail outlets, where sales are carried out using a computer program, and the printer will be a fiscal addition to such a sales station. Bono Lan E belongs to the segment of the most advanced fiscal devices. It features remote management, built-in web server, multi-communication and the highest standards of data security as well as an efficient and durable printing mechanism! Pharmacy version available.

**BONO LAN E** - Modern technology, enclosed in a handy and ergonomic casing intended for small and medium-sized retail outlets, where sales are carried out using a computer program and the printer will be a fiscal addition to this station.

**Electronic copy** - In this printer, a copy of the printout is stored electronically on a small SD card. One card may be enough for several years of printer operation. The data from the copies stored on the card are available to the user. They can be printed directly on the printer or read on a standard PC.

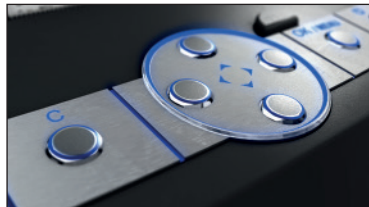

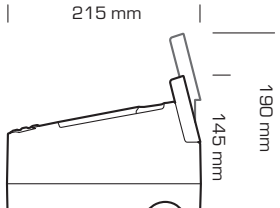

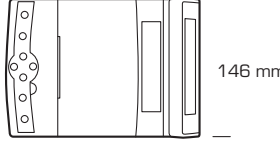

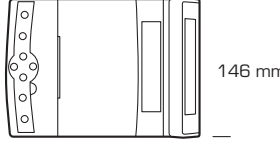

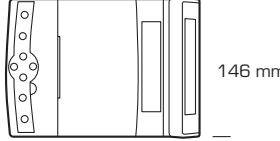

**Printing mechanism** - High-quality printing mechanism prints receipts, necessary reports and VAT invoices very quickly and quietly. The printer's operation program intelligently "compacts" all printouts, saving paper as much as possible.

**Printouts** - Printers can print a graphic logo in the header, place the buyer's tax identification number on the fiscal receipt, and issue any non-fiscal printouts, including invoices, barcodes, QR codes and any graphics. The name of the product printed on the receipt can be up to 40 alphanumeric characters long, and up to 255 sales items can be printed on one receipt. The VAT invoice template allows you to print the recipient and buyer data on the document.

**Communication** - The printer communicates with the computer via LAN, USB or traditional RS232 connectors using the most popular communication protocols in Poland, including the modern Novitus XML protocol. This protocol is particularly popular with companies that create web-based sales systems. The LAN port allows the printer to work independently in a computer network. Using one network cable, you can communicate with the printer via several programs: sales application, receiving data from electronic copies or handling electronic payments.

**Special pharmacy version** - BONO LAN E APTEKA is a fiscal printer dedicated to be used in pharmacies, pharmacy outlets, and wherever it is necessary to mark refunds on receipts. It can print additional descriptions of goods/medicines on the receipt and other pharmacy printouts: prescription description, order for a compounded drug, drug formulation, etc.

**Special version for passenger transport** - The printer is also certified as a specialised device for sales records in the provision of passenger transport services. Its TICKETER version cooperates with the most popular transport ticket sales programs.

<b>Parameters</b>		
Number of products	1 000 000	
Number of PTU rates	7	
Number of cashiers	without limitation	
Product name	40 characters	
Euro currency support	yes (multi-currency)	
Electronic copy	SD card	
<b>Printing mechanism</b>		
Type	thermal, „drop and work” type	
Paper width • Roll length	57 mm • 60 m	
<b>Keyboard</b>		
Type	membrane	
Number of keys	4 + navigation key	
<b>Display</b>		
Customer	graphic, illuminated, blue, extendable, rotary LCD, 132 x 64 pixels	
Operator	graphic, illuminated, blue LCD, 132 x 32 pixels	
<b>Interfaces</b>		
Communication interfaces	1 x LAN, 2 x RS232, 1 x USB	
Cooperation with devices	computer, EFT terminal, PinPad	
Drawer control	yes, 6 - 24 V	
<b>Power supply</b>		
External	external power adapter 230 V / 24 V; 1,25 A	
Internal	Built-in gel battery 6 V; 3 Ah	
<b>Dimensions</b>		
Weight	1,75 kg
